When you receive this kit, it is important that you read the instructions.

When you go to the facility it is important that you bring EVERYTHING in the box, including the box itself!

Attached to this letter you will find a draw facility located near you. You are responsible for calling this facility and getting your blood drawn on the date of which you have been advised.

Leave all the items inside the biohazard bag, as all of these instructions and supplies will be required by the draw facility. However, it is important that the person who is collecting your samples reads all the information contained within the biohazard bag before your sample is collected. A copy of your government issued photo ID is required to be sent with the kit. If this is not included, your specimens will be rejected.

Once your samples are collected, ensure that the facility returns everything into the box and puts it into their FedEx drop box (shipping already included). If for some reason the facility does not have a FedEx drop box or is not willing to send it, you are responsible to ensure that the samples get sent via FedEx the same day they are drawn.

If you should have additional questions, please do not hesitate to contact UNILAB at lab@infertilitylab.com or 877-522-5678

Thank you,

UNILAB
